SUMMARY

I am a full stack developer that wants to help create the future of tech. As a Chef and business manager in the hospitality industry I always thrived in the fiery pace of the kitchen or the customer satisfaction of the dining room. I love pushing myself in my personal life with cycling and being creative through writing or comedy. As a software engineer I will consistently bring my fire and passion for the customer and innovative products to my work.

SKILLS

- Html/CSS
- JavaScript
- React JS
- Express/Mongo DB
- Node JS
- Ruby on Rails
- Project Management
